<u>COLUMN</u>	<u>LINE</u>	<u>ERROR</u>
(57) Pg. 1, col. 2	Abstract 1-20 of text	delete the Abstract in its entirety and insert --In a fishing lure an improved system for holding a bait comprising a wire connected to a central shaft and extending through the central opening of a bead also mounted on the shaft. A piece of elastic tubing extends over the central shaft to form a surface on which a bait is held. The wire is wrapped around the bait to hold it in place. The wire is selected to be of a material and thickness such that it may be easily bent and unbent without kinking or breaking and once wrapped around a bait maintains its shape to hold the bait in place on a lure during fishing.--
